🌐 kundan-raj-portfolio

- Detail-oriented MCA student (First Year CGPA: 9.12) with a B.Sc. in Information Technology, skilled in Data Analytics and aspiring to grow as a Data Analyst.
- Experienced in EDA, data cleansing, data modeling (Star Schema), and ETL design using the Medallion Architecture (Bronze/Silver/Gold).
- Seeking a Data Analyst role to translate raw data into actionable business insights and support data-driven decision making.

Education

Noida Institute of Engineering & Technology

Expected 2027

MCA — First Year CGPA: 9.12/10

Greater Noida

Anugrah Narayan College (Patliputra University)

July 2022 – July 2025

B.Sc in Information Technology

Patna

Projects

Sales Data Warehouse using Medallion Architecture (MySQL) — Academic Project

- Designed and implemented an end-to-end **data warehouse** using Bronze → Silver → Gold architecture, integrating **CRM and ERP** data sources into a single analytics-ready model.
- Built the Bronze layer using `LOAD DATA INFILE` to ingest raw CSV data, then developed the Silver layer with **data cleaning and transformation**, including deduplication (`ROW_NUMBER()`), normalization, and validation.
- Designed the Gold layer as a **Star Schema** with `dim_customers`, `dim_products`, and `fact_sales` optimized for reporting and business intelligence queries.
- Applied **data quality techniques** such as NULL handling, correction of inconsistencies, and standardization into business-friendly formats, improving reliability for downstream analysis and KPI reporting.

Airlines Flight Data Analysis using Python and MySQL

- Analyzed **300,000+ flight records** to identify trends in **ticket pricing, routes, and airline performance**.
- Used advanced **SQL queries**, including aggregations, window functions, and subqueries, to derive business insights.
- Performed EDA using **Pandas, NumPy, Matplotlib, and Seaborn**, creating **20+ visualizations** and actionable recommendations.

Netflix Data Analysis using Python and MySQL

- Analyzed Netflix's content catalog to identify trends in **genre, release year, and country** using **Pandas, NumPy, and MySQL**.
- Created visualizations using **Matplotlib** and **Seaborn** to depict content trends and country-wise distribution, supporting content-strategy insights.
- Cleaned and processed over **10,000+ entries**, improving dataset integrity and deriving actionable insights for strategy.

Certifications

The Data Science Course: Complete Data Science Bootcamp 2026 – Udemy

July 2026

Python, NumPy, Pandas, Statistics, Data Visualization, Machine Learning, Deep Learning

SQL – MySQL for Data Analytics and Business Intelligence – Udemy

Feb 2026

SQL, MySQL, Joins, CTEs, Aggregate Functions, Database Design, Data Analytics

Technical Skills

- **Languages:** Python, SQL(My SQL, SQL Server)
- **Tools/Frameworks:** Pandas, NumPy, Matplotlib, MS Excel, Tableau, MySQL, Git
- **Analytics:** Exploratory Data Analysis (EDA), Data Cleansing, Data Transformation, Data Modeling (Star Schema), ETL, Statistical Analysis, Data Visualization, Reporting
- **Soft Skills:** Communication, Problem Solving, Self-learning, Teamwork

Languages

- Hindi (Native)
- English (Professional Proficiency)
